DETAILED ACTION

1. Upon considering Applicant's claim amendments and arguments filed August 25, 2003, Examiner has determined that multiple distinct inventions are claimed. Upon election of an invention and a species, if appropriate, the Examiner will reconsider the existing art rejection in light of Applicant's arguments.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 7-14, 16-18, 20-35, and 39-50, drawn to a seller pricing and selling a commodity and insurance instrument to a customer, classified in class 705, subclass 4.
- II. Claims 15, 19, and 36-38, drawn to the seller of a commodity and insurance instrument accepting bids from various bidders interested in purchasing the commodity and insurance instrument, classified in class 705, subclass 37.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as buying and selling any product from a vendor to a seller online (i.e., without offering a product up for bid). See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

5. Furthermore, this application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Directed towards the sale of a bundled commodity and insurance instrument (i.e., the ownership of the insurance instrument is transferred to the customer who purchases the commodity). Claims 4, 9-11, 13, 14, 17, 18, 20-35, and 41-50 are directed towards Species I.

Species II: Directed towards the sale of an unbundled commodity and insurance instrument (i.e., the ownership of the insurance instrument is not transferred to the customer who purchases the commodity). Claim 3 is directed towards Species II.

If Applicant elects Invention I from above, Applicant is also required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 7, 8, 12, 16, 39, and 40 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 3623

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was not attempted because the requirement for restriction is complex. See MPEP § 812.01.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3623

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susanna M. Diaz whose telephone number is (703) 305-1337. The examiner can normally be reached on Monday-Friday, 9 am - 5 pm.
